Welcome.

We are a fire safety solutions and electronic security systems integrator with corporate offices in Lagos, Abuja and Port Harcourt. A customer oriented company;

Jegcy Systems Limited offers a full range of services including design, engineering, project management, installation, repair and training and support services.

Vision.

Our Vision at Jegcy Systems Limited is to be the number one in the industry of fire safety, low voltage electronic security & telecommunication solutions' provider. We will achieve this feat through our introduction of Best Working Practices, Training and Development of our employees and at all times striving to exceed expectation while adding genuine value to their businesses.

Jegcy Systems Limited is an indigenous company in NIGERIA.

The Company Jegcy Systems Limited has the capability for providing engineering, construction, inspections, QAQC, manpower supply, training and procurement services to both the upstream and downstream operations in engineering and technical services, materials management, and equipment supplies, industrial and logistic support.

In execution of this project, it is the policy of our company that every reasonable effort shall be made to ensure that all employees have a safe and healthy place in which to work with adequate welfare facilities and that the surrounding environment shall not be adversely affected by work activities. The prevention of all accidents particularly those involving personal injury or damage to property is recognized as being essential to efficient operation.

FIRE EXTINGUISHER BALL, DROPLETS, VASE & FIRE ESCAPE BOTTLE

Fire extinguisher ball is a fully automatic fire extinguisher, when thrown or rolled into fire burst and extinguish the fire immediately. Fire extinguisher droplets kill fire in seconds. Vase fire extinguisher is easy to store, simple and easy to use, eco-friendly, non toxic and harmless, Fire escape bottle – resistance to voltage stabilizer, anti – glare UV fragile, throwing type. They are highly efficient and cost effective.

PORTABLE FIRE EXTINGUISHERS

We provide, maintain and install the best products fire extinguisher used to put out a small fire by directing onto it a substance that cools the burning material, deprives the flame of oxygen with the chemical reactions occurring in the flame

KITCHEN FIRE SUPPRESSION

It is designed to protect a wide variety of kitchen appliances, such as stoves or deep fat fryer. It is installed in the kitchen hoot exhaust.

FIRE ENGINE/FIRE TRUCK

Fire fighting apparatus, transporting of fire fighters and equipment for firefighting operations with a specialized functions, such as wild fire suppression and aircraft rescue and may also carry equipment for technical rescue.

FIRE HOSE REELS

FHR provide reasonably accessible and controlled supply of water for fire extinguishing.

FIRE PUMPS AND PANEL

It works through the use of an engine, which can be powered by electricity, diesel, or sometimes by steam turbines. The pump is activated when one or more of the sprinklers in the system is triggered, causing the pressure in the system to drop below a specific level.

Access Control Systems

Our access control provides the ability to control, monitor and restrict the movement of people, assets or vehicles, in, out and round a building or site. We offer you the ultimate web-based solution in effective security management.

Fire Detection and Automatic Extinguishing System

Our cost-effective solutions range from frontline detection to integrated control / management and automatic fire extinguishing system.

Surveillance Systems

Our CCTV systems have great capabilities for remote monitoring from a small office to large organizations over the LAN or WAN using basic devices including Analogue or IP cameras, video distributors and digital video processing equipment.

Public Address System

Our Public Address and Conference System are designed to create a real sense of harmony that is reflected in the dear sound from its loudspeaker and the balance it strikes between innovative design and advanced performance.

Intruder Detection System

Our Intruder Systems consists of a panel, which is the control centre that provides information about the operation of the system, with remote keypads for programming the system and other accessories such as Motion detectors, Panic alarm buttons and Sounders to raise an alarm in the presence of an intruder.

Customer Service

Jegcy Systems Limited philosophy and approach to customer service is unparalleled. We are committed to: unmatched responsiveness; friendly and reliable customer relationships.

Technical Service

Our technical service department staff includes specialists in troubleshooting and repairing CCTV systems, access control equipment, IT equipment & peripherals, electronic locking hardware, gate operators and alarm systems.

Loaner Equipment

Jegcy Systems Limited maintains a comprehensive inventory of loaner stock to temporarily replace our customer's equipment when it must be sent out for repairs.

On-Site Service Center

Our in house service repair center is an authorized warranty repair facility for many of the systems we provide. Our Service Center is equipped to repair cameras, monitors and recording devices, circuit boards, as well as other security equipment.

Customer Training

Jegcy Systems Limited provides complimentary training, for its clients, on the use and operation of their Jegcy Systems Limited provided systems throughout our standard one year warranty period.

Maintenance Contracts

Jegcy Systems Limited offers structured service plans to maintain security installations, even long after many manufacturers declare their components obsolete. We are still maintaining many systems that were originally installed some years ago.

Engineering Service

At Jegcy Systems Limited we use modular designs with off-the-shelf products that can be fully integrated. Jegcy Systems Company assembles in-house engineering and factory-certified support to ensure the highest level of customer satisfaction and safety.

HSE Briefing

Introduction

HSE is the acronym for Health, Safety and Environment. HSE has become very important in all spheres of human endeavors because of the realization of their importance in the protection of lives, properties and the environment. It is therefore necessary that all persons irrespective of the type of work or activity engaged in have basic knowledge of HSE. To engender HSE awareness and practices, companies now have HSE policies.

Safety Objectives

In pursuance and total realization of our safety policy, the following shall constitute our safety objectives

Preserve and prolong the life and health of all our employees.

Work freely and ensure non-violation of all kinds of safety regulations.

Help diffuse and include safety awareness and consciousness into our operations.

Ensure that safety is advocated at all times throughout one's life.

Encourage long service of manpower and other labour force.

Educate and emphasize new findings and the importance of safety to all and sundry.

Awaken the working morale and attitudes of workers towards appreciating their working conditions, safety wise.

Expatriate the safety scope of workers and rekindle safety awareness and consciousness in workers at all times.

Be sensitive to the needs of communities while taking the environmental impact of all activities into consideration.
